Siddhi Shelat
Arohi Chinchawalkar
Ashwini gunday

Right now, I only need the first name in Excel, so I have two methods.

1. Write one candidate's **First Name** and use **Flash Fill**.
Shortcut Key: Ctrl + E
2. Select **All** and press **Ctrl + H**. The **Find and Replace** box will open. In "**Find what**," enter a **Space**, and in "**Replace with**," enter the ***** mark. Then click "**Replace All**." This will delete all the last names.

Excel: Separate Text and Numbers

ABCD
78946612378
ABCD
78946612378
ABCD
78946612378
ABCD
78946612378
ABCD
78946612378
ABCD
78946612378
ABCD
78946612378

1. Select the **entire data** where you want to separate the text and numbers.
2. Press **Ctrl + G** to open the **Go To** window.
3. Click on **Special**.
4. Select **Constants**.
5. Under the options, select only **Text** and uncheck the other options.
6. Click **OK**. Excel will select only the cells containing text.
7. Press **Ctrl + C** to copy the selected text cells.
8. Select the **destination cell/column** where you want to paste the text.
9. Press **Ctrl + V**.
10. Now, you will have **only the Text values in the selected column**.

Shortcut: Ctrl + G → Special → Constants → Text → OK → Ctrl + C → Ctrl + V

Excel Formula to Calculate Total OUT

In	15
Out	20
In	511
Out	144
In	50
Out	45
In	10
Out	78
In	14
Out	100
In	58
Out	65
In	32
Out	89
In	40
Out	100

11. Use the SUMIF formula: Select the IN/OUT column, then type "OUT", select the Amount column, close the bracket, and press Enter.

12. Formula: =SUMIF (INOUT Column,"OUT",Amount Column)
